

SAVE LIVES

DONATE PLASMA TODAY!

WHAT IS PLASMA?

PLASMA IS THE CLEAR, STRAW-COLORED LIQUID PORTION OF BLOOD that remains after red blood cells, white blood cells, and platelets are removed.

YOUR BLOOD IS:

55%
PLASMA

44%
RED BLOOD
CELLS

1%
WHITE BLOOD
CELLS & PLATELETS

WHO CAN DONATE PLASMA?

DONORS MUST BE:

18 YRS+

50 KG+*

MEDICALLY SCREENED

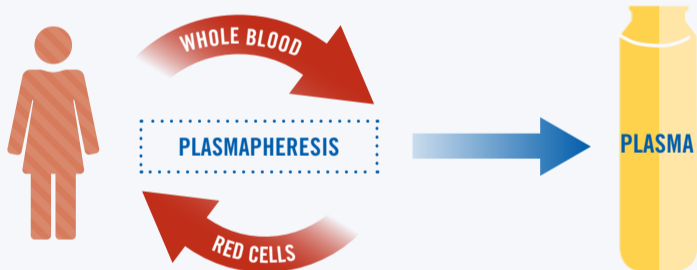

TESTED NEGATIVE FOR
SPECIFIC VIRUSES

*55KG IN SOME COUNTRIES

HOW DO YOU GET MY PLASMA?

Plasma is collected through a process called **PLASMAPHERESIS**, where plasma is separated from your blood and red blood cells are returned to your body.

IS DONATING PLASMA SAFE?

Thousands of people **SAFELY DONATE** plasma everyday. Plasma donation is performed by professional staff in a highly **CONTROLLED, CLINICAL ENVIRONMENT**. The plasma collection set is sterile and only used once.

VISITS

YOUR DONATION MATTERS!

It is **ESSENTIAL** that willing, healthy donors donate plasma because...

EVERY YEAR IT
TAKES MORE THAN

1200:

Plasma donations to treat
ONE PATIENT for **HEMOPHILIA**.

MORE THAN

130:

Plasma donations to treat
ONE PATIENT with a **PRIMARY
IMMUNE DEFICIENCY**.

MORE THAN

900:

Plasma donations to treat
ONE ALPHA-1 PATIENT.
